Certificate for Konstantine Tordia

Konstantine Tordia has spent a trainee period as a medical student in our endocrinological clinic "Hormon- & Stoffwechselzentrum Prof. Wüster MVZ" in Mainz, Germany from June 1st, 2021 until June 30th, 2021.

During this period, she has learned to perform ultrasound examination of the thyroid, parathyroid and adjacent neck organs under my supervision. She has done around 100 examinations herself and she has shown to be extremely skilful in this respect. She learned all about endocrinological functional tests and osteological diseases. She performed bone densitometry using dual-X-ray absorptiometry (DXA). She also visited thyroid and pituitary operations at the university. She is a very nice and intelligent person and has always been very friendly to the patients and within our team.

Best regards

Prof. Dr. med. Dr. h.c. Christian Wüster, M.D.
Internal Medicine, Endocrinology and Osteology
